SUMMARY

Applied Computer Science and Business (Co-op) student at Acadia University with experience across software engineering, full-stack development, data/ETL, cloud/DevOps, quality assurance, and business operations. Strong in requirements analysis, stakeholder communication, process improvement, testing, root-cause analysis, and practical software delivery. Seeking Winter 2027 co-op opportunities in software engineering, technology, data, consulting, and business analysis.

TECHNICAL & BUSINESS SKILLS

Programming: Java, C#, C++, Python, JavaScript, TypeScript, C, Go, SQL, HTML, CSS **Software:** OOP, Data Structures, Algorithms, Design Patterns, SDLC, Agile/Scrum

Development: React, Node.js, Express.js, Flask, FastAPI, Spring Boot, REST APIs, WebSockets, Socket.IO, WebRTC

Data/Databases: Pandas, Apache Spark/PySpark, ETL, Data Quality, PostgreSQL, MongoDB, SQLite, Redis, Firebase

Cloud/DevOps: Azure, Docker, Docker Compose, Terraform, GitHub Actions, CI/CD, Linux, Git, GitHub, Postman

Business/Analytics: Requirements Gathering, Stakeholder Communication, B2B Communication, Process Improvement, Operations, Data Analysis, Excel, Documentation, Root Cause Analysis

EXPERIENCE

InfoCepts

Junior Software Engineer Intern

Remote, Canada

May 2025 – Aug 2025

- Investigated application issues, workflow problems, and software defects through reproduction, root-cause analysis, testing, and technical documentation.
- Diagnosed and resolved 30+ software defects while validating fixes and supporting reliable enterprise application workflows.
- Contributed to Agile activities involving requirements analysis, system validation, testing, and issue resolution, improving processing efficiency by approximately 15%.

Arivo Homes

Co-Founder & Full Stack Developer

Remote, Canada

Dec 2025 – Apr 2026

- Built a full-stack property platform using React, Node.js, Express.js, MongoDB, Redis, and Firebase for property discovery and management workflows.
- Supported 35+ active users and 50+ property listings while gathering user requirements and troubleshooting product workflows.
- Improved backend performance by approximately 30% through Redis caching and database query optimization.

PepsiCo

Quality Assurance Technician

New Minas, NS

Apr 2025 – Aug 2026

- Performed structured quality checks, documented process deviations, and supported corrective actions to maintain product and process standards.
- Applied issue identification, standardized procedures, quality documentation, and attention to detail in a fast-paced production environment.

ASU Food Cupboard

Co-Programming Lead

Wolfville, NS

Sept 2025 – Apr 2026

- Improved inventory workflows through automation, reducing manual tracking effort by approximately 40%.
- Gathered requirements, troubleshooted operational workflows, and implemented practical technical solutions for day-to-day program needs.

Ghotra Freight Carrier

Communication Lead

Feb 2023 – Aug 2023

- Negotiated freight contracts, improving load efficiency and increasing profit margins by approximately 15%.
- Coordinated logistics tracking and B2B communication to support reliable and timely supply chain operations.

SELECTED PROJECTS

IncidentFlow

React, Vite, Tailwind CSS, Node.js, Express.js, MongoDB, Socket.IO, WebSockets, REST API, Docker

GitHub

- Built a real-time incident response and operations dashboard supporting incident creation, filtering, severity/status management, assignment, acknowledgement, resolution, activity timelines, and live updates.

Chatty

GitHub

React, Node.js, Socket.IO, WebRTC

- Developed a real-time communication platform with messaging and peer-to-peer voice/video communication using WebSockets and WebRTC.

Azure DevOps Operations Lab

GitHub

Python, FastAPI, Azure, Terraform, Docker, GitHub Actions, Pytest, REST API

- Built a cloud and DevOps operations lab integrating infrastructure-as-code, containerization, CI/CD automation, REST APIs, and automated testing.

Distributed Data Processing Pipeline

GitHub

Python, Apache Spark/PySpark, ETL, Pytest

- Built a data processing pipeline focused on ETL workflows, distributed processing, and automated validation with Python, Spark/PySpark, and Pytest.

EDUCATION

Acadia University

Bachelor of Applied Computer Science (Co-op), Business Minor | GPA: 3.5+

Wolfville, NS

Expected 2027
